Fintech development

Infrastructure Support

Who we are

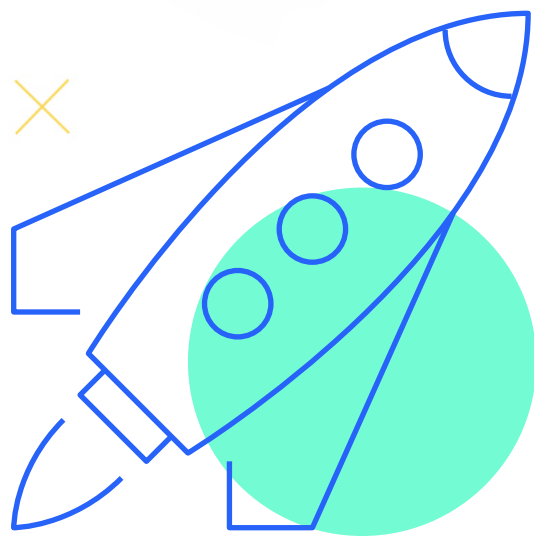

We are **technology addicted professionals** who build trust by delivering **excellent client experience**

Axonian is a company of ambitious technology professionals. Our main idea is really simple - to help smart people, entrepreneurs and companies with technology aspects of their projects. We give them the opportunity to focus on the business while we do what we do best - amazing software development. We are a people oriented company. We believe that the only way to achieve outstanding results is to do the right things with the right people.

How we can help a startup

We know what it takes to launch a startup, find a traction and raise a round. We are here to help you in this journey no matter what stage you are now in:

- ✓ We create a technology **vision** based on **your ideas**
- ✓ We build **prototypes** and **MVP** to test your ideas
- ✓ We are **flexible** and always ready for changes and pivots
- ✓ We help you to dig thru unit economics, metrics and USP, create a pitch and presentation

For ICO startups

Looking to raise money thru **Initial Coin Offering?**

You don't need to be a blockchain or fintech startup to use ICO.

Any legitimate online/offline business is welcome.

We are coming from fintech and blockchain community, have experience **doing ICO** and will guide you all the way thru:

- ✓ We create an **ICO concept** based on your idea
- ✓ We draft a **white paper**
- ✓ We provide an **ICO platform** to collect investments, issue tokens and manage
- ✓ We develop **smart contracts**
- ✓ Our **legal advisors** will help you with setting up right corporate structure
- ✓ Our marketing partners will help you with **worldwide PR** and journalists relations
- ✓ We'll get you listed on top crypto exchanges

- ✓ Hadoop
- ✓ Spark
- ✓ Cassandra

Databases

- ✓ SQL DBs
- ✓ NoSQL DBs
- ✓ Timeseries DBs
- ✓ Embedded DBs

DevOps

- ✓ CI/CD
- ✓ ELK
- ✓ Prometheus
- ✓ Icinga

Desktop

- ✓ C++/Qt5
- ✓ Electron

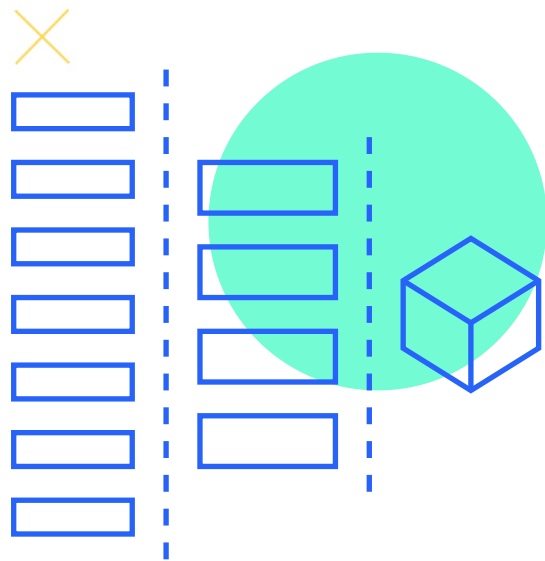

Digital

- ✓ UX/UI
- ✓ Design

Cooperation models

1. Fixed cost

When addressing a software development company, most clients already know how much they are willing or can afford to spend on their product.

The price & scope will not change

Cost and timeframe are specified before the beginning of the work on project

Minimum risks

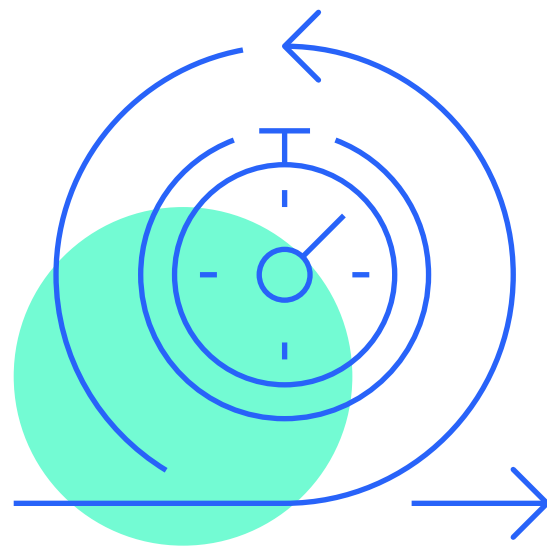

Good for small and medium level projects that have well-defined specifications and precise deliverables from the start

Cooperation models

2. Time and materials

Unlike the fixed price approach, the time and material model offers more flexibility in terms of both budget and project requirements. In this case, the total cost of the project, as well as its scope, remains unknown until the product is ready. It depends solely on the actual time and effort used to implement it.

Pricing is based on direct labor hours at specified fixed hourly

Suitable for situations when the requirements are not fully known, or are expected to change

The client can ramp-up and ramp-down project teams as per requirements and budgets

Portfolio // EveryWallet.com

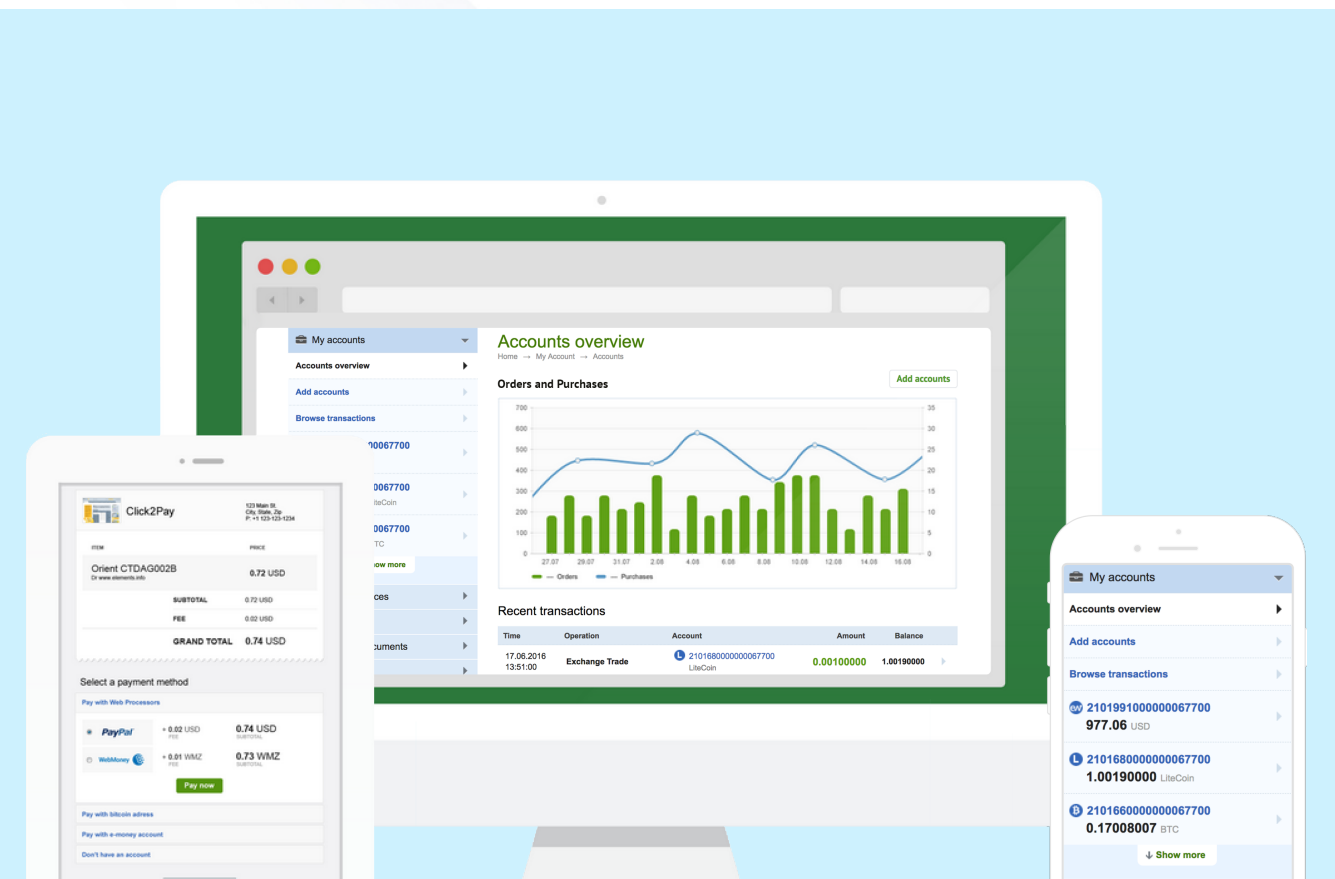

EveryWallet is a blockchain payment platform, which consists of several large modules. It allows users to use their blockchain assets as well as fiat payments transparently in everyday life.

During 3 years of development we implemented all required features, from idea to deployment:

- Merchant acquiring
- Online wallet
- Exchanges
- Desktop clients

Technologies: JS, Java, NodeJs, PostgreSQL, Redis, C++/Qt

Portfolio // Unibet

Contractory works for Unibet.com, one of the largest betting provider in UK.

Together with Unibet's team we managed to develop and deploy supplementary web-sites for their content-based marketing strategy.

The web-sites were based on Wordpress and aggregates information, useful for betters

We were happy to work together with Unibet team.

Tehcnologies: **Wordpress, PHP**

Portfolio // President.gov.ua

Developed after Orange revolution of 2005 in Ukraine, the Official web-site of President of Ukraine.

Our team managed overall process of web-site upgrade from its predecessor. It consists of web-design, production, deployment and stuff education.

As a result, we succeeded to deploy a new version of the government portal in extremely tight terms (4 months from start till launch) and supported the project till 2009, including 1 redesign.

Technologies: PHP, Java, HTML, MySQL

Contacts and HQ location

We are here to help. We will be pleased to hear from you, or receive a proposal for joint cooperation. We will get in touch with you within 24 hours.
